COMPANY PROFILE

Factory Since
1999

ISO 9001
Certification

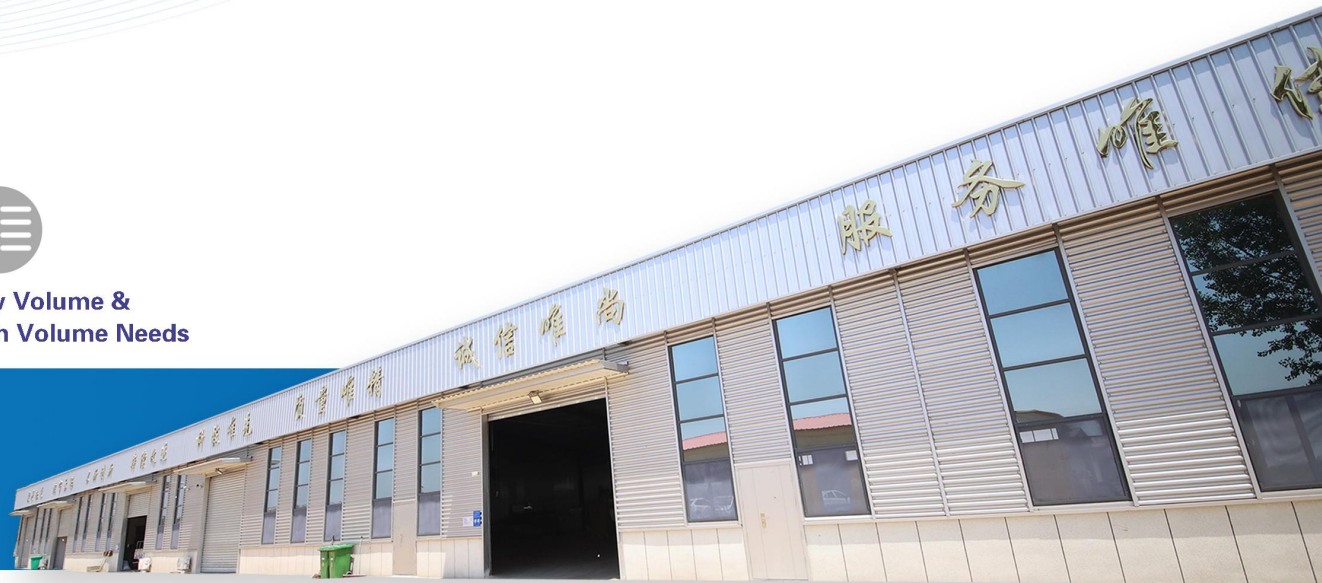

100+ metal
materials available

Low Volume &
High Volume Needs

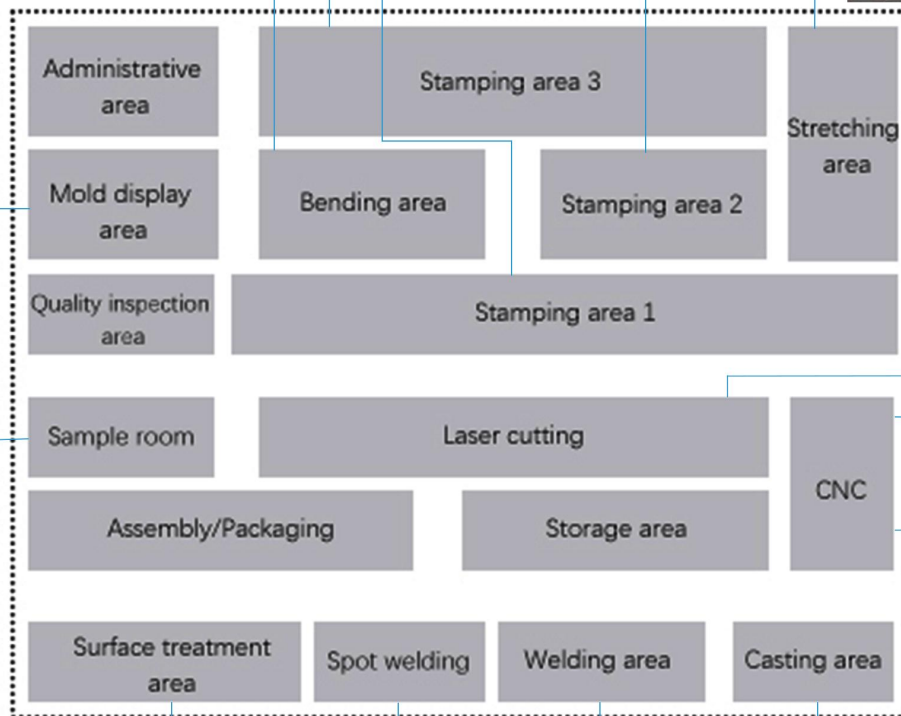

QUALITY FIRST
STABILITY ALWAYS

Weizhi is a professional metal custom fabrication factory in China. Since 1999, we have been providing metal fabrication services to the world. Our factory close to Beijing and Tianjin Covering an area of 8,000 square meters. The existing staff 109 people. can create almost any metal project.

Weizhi as a metal fabrication factory main business is OEM metal fabrication . We are good at metal stamping, CNC machining, deep drawing, laser cutting, bending, welding, drilling, grinding, spinning, die casting , etc. With these process capabilities we can create almost any metal project.

FACTORY FLOOR PLAN

Over the years, our investment in equipment has been consistent. Weizhi has single point of the largest 400T level stamping equipment. High power 6kw laser cutting machine and 5-axis CNC machine .

In addition Weizhi equipped with CNC welding equipment, hydraulic press equipment, surface treatment, bending and other advanced equipment. Professional metal fabrication technology and advanced equipment complement the advance.

Weizhi specializing in metal processing, boasts an extensive range of advanced equipment, enabling us to meet the demands of large-scale projects effectively. With cutting-edge machinery and technology, we ensure high-quality precision in every aspect of our work, positioning us as a leader in the industry. There is our equipment list.

Stamping Machine

Bending Machine

Oil Pressing Machine

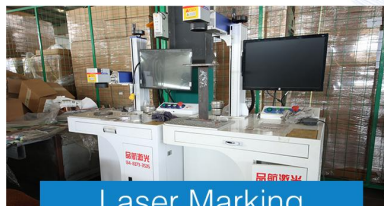

Laser Cutting

CNC Machine

CNC Spot Welding

Laser Marking

Surface Treatment

Shot blasting

FACTORY EQUIPMENT

80-400 tons stamping machine : 38 sets
6kw laser cutting equipment : 4 sets
Bending machine : 3 sets
CNC milling&turning machine: 4 sets
Automatic spot welding : 1 sets
Laser marking machine : 4 sets

Oil pressure machine : 4 sets
Surface treatment production line : 2 Sets
Drilling machine : 12 sets
Electric welding production line : 3 sets
Forging equipment: 1 set
Coordinate Measuring Machines (CMM): 2 sets
Laser tube cutting machine: 2 sets

PRODUCT PROCESS

Metal fabrication includes several types of products such as welded structures, stamping parts, machined components, and sheet metal assemblies. Its applications span various industries, including automotive (e.g., car chassis, body panels), construction (e.g., steel beams, reinforcements), aerospace (e.g., engine parts, fuselage), and electronics (e.g., enclosures, brackets). These metal fabrication products picture are crucial in creating functional and structural components across diverse sectors.

CUSTOMIZED PRODUCT DISPLAY

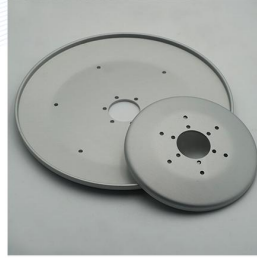

Rich Experience In Customizing Metal Parts: 70,000+ Types Customized

Over the years, our metal fabrication factory have customized more than 70,000 kinds of metal parts. These include chassis, cabinets, housings, brackets, frames, etc., ranging from 0.5cm gaskets to 4-meter-high insulation boxes. They involve automobiles, electronics, energy, medical care, home gardening, agricultural equipment and other fields, providing related metal customization services worldwide.

STORAGE AREA FOR MATERIALS AND SEMI-FINISHED PRODUCTS

Weizhi is a metal processing factory specializing in a range of techniques, including laser cutting, bending, stamping, welding, deep drawing, and surface treatment. A key aspect of our professional capabilities lies in our deep understanding of various materials and their unique processing characteristics. This knowledge enables us to tailor solutions that meet specific project requirements effectively.

PACKAGING

All the packaging work is carried out in an independent warehouse of more than 1,000 square meters. We have made multiple layers of protection for each package to prevent damage during transportation, so that our customers can get undamaged products

WAREHOUSING

SERVICE QUALITY

1.Batch output $\geq 99\%$

2.Batch rework failure rate $\leq 1\%$

3.Customer complaint rate is zero

Delivery quality is 100%, delivery is 100% timely,
and 100% meets your requirements

1.Free drawing optimization service

2.24-hour quotation

3.Samples available within 72 hours

4.0.01mm accuracy guarantee

5.100+ metal materials available

6. ISO 9001 certification

We have over 22 years of engineers and professional foreign trade team to service Through out the years,

We have assembled a dedicated staff that thrives on being product and industry experts. Every one of them seeks to make your job safer and easier.

We are always happy to take your calls and promptly answer any questions about product, price, shipping, or custom order requests.
